SUMMARY

Third-year Computer Science Engineering student at Gokaraju Rangaraju Institute of Technology with a strong foundation in Java, Object-Oriented Programming, and DBMS. Currently developing problem-solving skills through Data Structures and Algorithms and exploring Machine Learning and emerging AI technologies. Interested in software development, intelligent applications, and building practical solutions using modern development approaches.

EDUCATION

Gokaraju Rangaraju Institute of Technology (GRIET), Hyderabad

Bachelor of Technology – Computer Science Engineering

Expected Graduation: 2028

PROJECTS

SpendWise — Personal Finance & Expense Management Application | Status: Currently under development

- Developing a finance management application inspired by expense-splitting and personal finance platforms.
- Working on features for tracking and managing expenses and simplifying personal financial management.
- Exploring AI-assisted development techniques while building and improving the application.
- Currently working on authentication, authorization, and application functionality.

TECHNICAL SKILLS

Programming: Java , Python

Core Concepts: Object-Oriented Programming (OOP)

Data Structures & Algorithms: Currently developing proficiency

Database: DBMS

Development: AI-Assisted Development

Emerging Technologies: Agentic AI, Generative AI, Machine Learning

AREAS OF INTEREST

Agentic AI and AI-Powered Applications Generative AI and Large Language Models Machine Learning Intelligent Automation Software Development Data Structures & Algorithms Problem Solving Backend & Application Development

COURSEWORK

Object-Oriented Programming Data Structures & Algorithms Database Management Systems Artificial Intelligence Machine Learning Operating Systems

PROFILE HIGHLIGHTS

Strong interest in Agentic AI, Generative AI, and emerging software technologies. Interested in developing intelligent applications that automate tasks and improve user experiences. Currently focused on strengthening Data Structures and Algorithms skills. Hands-on experience developing a real-world finance management project. Comfortable learning new technologies and applying them through practical projects.
